She worked as manager of the Drug Dept. in Hess Department Store in Lancaster until the store closed. Karen moved to York and worked for a Travel Agency for a time. She had gone with three fellows and broke off with each and decided that she would not marry, but did want to be a mother, so she started by taking the instructions to become a foster mother.

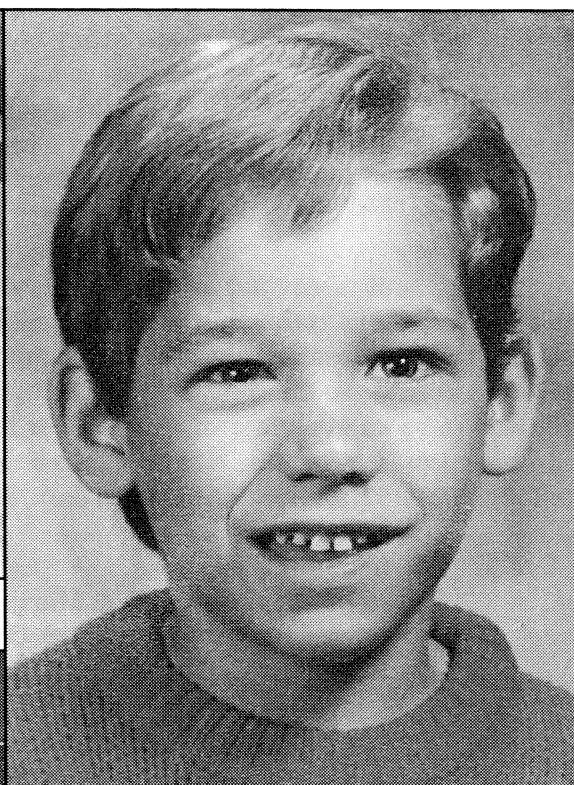

KAREN - 1979 (487)

One of the first babies she had was Lee who was 18 months old when he came to live with her.

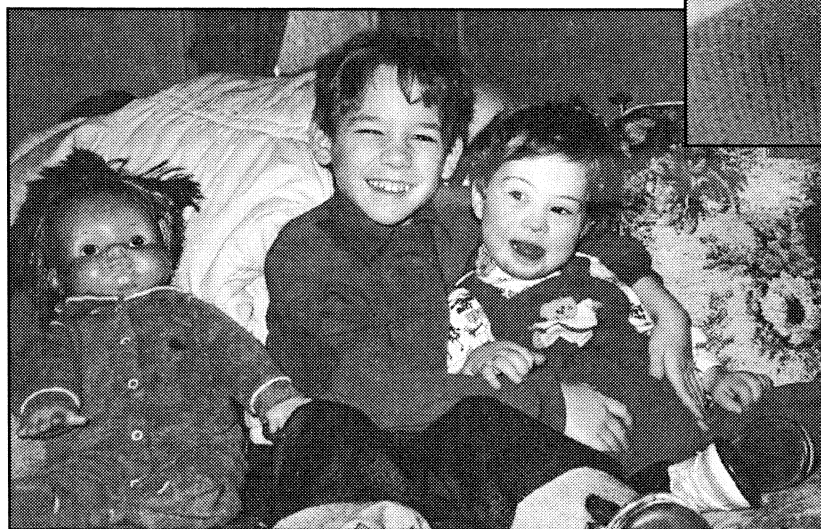

Karen legally adopted Lee when he was about 2. Her sister and her husband also wanted to adopt him, but Karen was the one to receive him. In order to be able to stay home & raise him herself, she purchased a business called "Wee Care". It offered baby care for little ones up to school age. She had about 14 women working for her, each caring for 6 little ones, Karen also having the same number. She wanted another child and so applied for a Down Syndrome baby and within a year she received a Jewish boy who was just 2 months old. She named him Matthew Win - he was b. 22 Aug., 1986. Lee was b. 31 Oct., 1982. During all this time she was living in a small apartment and so she applied for and was lucky enough to get the first Habitat House that was remodeled in York, Pa. In the fall of 1987 she fell and broke both ankles! Her Daddy took over for her (Jokingly stating that he had just retired from a desk job to do washing and cleaning and cooking!). Her Mother was kept busy in Lancaster helping her own Mother who was not well. She still has a plate in one ankle and several pins in the other.

MATTHEW WIN - DEC. 1986 (487)

LEE ALLAN - 1987

LEE & MATTHEW - 1989

Over the years she permitted herself to gain much, too much weight and in April, 1993 she was rushed to the hospital because she could not breath. She remained there for 17 days as she had had heart failure at age 41! We, her parents, kept the children in their York home during her stay in the hospital and for a time after her return home - until someone was found to live-in. She had to lose weight and remained on oxygen until the following March. A year after this the doctors determined that it was not heart failure, but a virus that had settled in the heart. And she had to give up her business and rest for the year. Now she may do a little house work. After her sister stopped working she took over and kept things going for the little family. Both boys, being handicapped, started school when they were 3 and each is doing rather well. Lee, who is a Fragile X child is hyperactive and does tend to get into trouble quickly and often! Both are loved very much.

MARIE, LAURIE, BILL & BILLY (491)

ANN MARIE (491)

BILL, BILLY & MARIE - 1990 (491)

BILLY & GIRLFRIEND - 1994 (491)

Laurie Moyer is a spunky, young business secretary who doesn't take her illness sitting down.

Like one in every 1,600 Americans, Laurie was born with cystic fibrosis, a hereditary disease in which the lungs, liver and pancreas secrete large amounts of thick mucus. Breathing and digestion are hampered by the secretions, but twice a day on the job at Air Products Laurie stops typing to jog and inhale a medicated mist.

She combines aerobic exercise and respiratory therapy to "save time," she said during an interview in her Allentown home this week. Her daily regimen begins at 4:45 a.m. at home each day, when she does her first respiratory therapy session, using a hand-held tool to clap her back and other techniques to loosen and drain the mucus from her lungs. She does four daily sessions in all.

At 22, Laurie discounts the grim reports that cystic fibrosis kills more children and young adults in this country than any other inherited disease.

"I've just decided I'm going to live forever. I'm too happy," she said with an eye on Gary, her husband since May 21. "I keep the attitude I'm gonna live and I don't care what others say."

Gary added, "I think she's stronger and a more giving person because of her disease than people who are perfectly healthy."

Laurie said the rigorous routine requires a lot of self discipline. She credits her husband, parents Bill and Marie Guthier of Pleasant Valley and Air Products with providing her with ample support and encouragement.

Diagnosed at 17 months of age, when her mother was already pregnant with a sister who would die from the disease at age 6, Laurie observes, "My parents were very strong to cope with that. They always made sure we got the best of care and equipment, even if it meant they had to sacrifice."

"That's why I'm here today," she said, adding that her sister's disease was more progressed at birth.

Laurie said although some doctors used to tell her not to over exert herself, she was spurred to start running by her dad and the loss of a close friend who had cystic fibrosis.

"I was so furious that this had happened to my friend Cindy — she was 14 when she died — then I said, 'This is it,'" Laurie said, explaining that was when she became really serious about working to keep herself well.

She ran up to four miles a day and had put another 15 pounds on her 95-pound frame, she said with pride.

Introduced to Air Products 2½ years ago as a Kelly Services temporary employee, the business school student applied for a secretarial opening and got it.

Although she admits she didn't volunteer that she has cystic fibrosis on the application for fear of discrimination, Laurie said she's been amazed at the cooperation and support offered by the company when she told them.

Explaining to a company nurse that she would like to do some inhalation therapy during a break because the pain and pressure of her congestion after a full day's work, the nurse volunteered to help in any way.

"Air Products manufactures the compressed air I use in my therapy, they had the tanks there (in a company health unit) that day," Laurie said.

"If I didn't do the therapy, I know I couldn't work full time," she said.

The health unit where she performs the 45-minute to an hour of aerobics and medicated breathing exercises is just below the floor where she works.
